Select Databases

- [PsycARTICLES](#) -- Search PsycARTICLES for full text of articles from APA journals and EPF (Educational Publishing Foundation) journals, most from 1985 to the present. Search PsycINFO for bibliographic references, most with abstracts or content summaries, to psychological literature from 1800s to the present.

- [PsycINFO](#) -- PsycINFO contains nearly 2.3 million citations and summaries of scholarly journal articles, book chapters, books, and dissertations, all in psychology and related disciplines, dating as far back as the 1800s.

- [PubMed](#) -- This resource covers articles published in 3900 biomedical journals.

- [JSTOR](#) -- A database of scholarly journal articles including illustrations in literature, social sciences, mathematics, arts, and sciences. A much greater range of dates is represented than in most databases.

- [EBSCO Academic Search Premier](#) -- Multidisciplinary database containing full text articles for nearly 4,700 publications, as well as indexing and abstracts for 8,172 journals.

- [INFOTRAC Expanded Academic ASAP](#) -- Database covering social sciences, the humanities, science and technology, national news, and general interest magazine.

- [Proquest](#) -- Search one or more subject specific databases that Proquest provides. Subjects such as Biology, Computing, Education, Health Management, Psychology, Social Science, and major U.S. Newspapers are available through this resource.

Web Resources

- [Social Psychology Network](#)
    - [Web-Based Reference Tools](#)

- o [Links by Subtopic](#)
- [American Sociological Association publications](#)

  Not everything is available to nonmembers, but if one took the publication name and took it to the [Journals and Newspapers Database](#), he/she might find copies.
- [APA topics](#)
- [Classics in the History of Psychology- Social Psychology](#)
- [Tutorial Guide to APA style](#)
- [Psychological Tests for tudent Use](#)
- [The Trust Institute at Stony Brook University](#)
- [Trustmojo](#) is an ongoing research project exploring trust on the new web.

  We, Alexander Ljung and Eric Wahlforss, spent three months in San Francisco in the summer of 2006 visiting cool places and talking to interesting people about trust. We trying to understand just how interpersonal trust works on the web. Our focus are on questions such as "What exactly is mediated trust?", "What role does interpersonal trust play in the context of Web 2.0 and beyond?", and "How does new representations of identity affect the way we build and establish trust online?".

  Trust is a basic underlying component of every society and it enables people to interact and build relationships. Without trust, societies simply would not function. As people spend more time online, mediated trust becomes increasingly important. People are building, complementing and fostering their new or pre-existing relationships via the web and interpersonal mediated trust has become a part of everyday life.

  We think this is really interesting, and so we've decided to study the issue of trust on the new web on location in San Francisco. Trustmojo is our project platform, and we'll use it to put out, and structure our thoughts hopefully also to foster discussions and get feedback from people like you. The project itself will result in a joint master's thesis at Royal Institute of Technology in Stockholm, and a series of presentations and talks. We would also like to thank our sponsors Plazes and Grädde Invest for making this happen. You guys rock!

- [TRUSTe®](#) is an independent, nonprofit organization dedicated to enabling individuals and organizations to establish trusting relationships based on respect for personal identity and information in the evolving networked world. Advancing privacy and trust for a networked world, we certify and monitor web site privacy and email policies, monitor practices, and resolve thousands of consumer privacy problems every year.

Search Strategies

For databases

1. Conduct an advanced search.
   a. Have "Social Psychology" as your subject.
   b. Relate the subject and your keywords with the Boolean operator "and, or " or "not"
   c. Enter in any other potential subject headings I.E. "Healthcare", "African Americans", "Israel", "Pakistan", etc
   d. Relate these with keywords that specifically describe your topic.
2. If your results are too narrow, start eradicating lines from your search. First eradicate the keywords, then some of the subject headings.
3. Try to rearrange your search to see if your relevancy vs. recall is affected.

Search within a journal

- Locate a specific journal that deals with Social Psychology. Some databases will allow you to conduct searches within the holdings of a specific journal. Search within titles with your keywords that describe your topic.

Check the bibliographies

1. If you have a particular article that you find specifically relevant to your topic, look to see if you can locate the articles in the bibliography. Most likely, these articles/items will also be relevant to your topic.

Keywords

Trust	Distrust	Philosophies of trust	
Trustworthy	Untrustworthy	Trust/distrust and races	Trust/distrust and nations/countries
Consequences of trust/distrust	Trust issues	entrust	assign
consign	commit	delegate	opposites= distrust, mistrust, doubt
